

All instructions regarding how to run the website have been provided in the GitHub README, the following document can be used to understand how to navigate the website as each of the end users (client, venue owner and administrator).

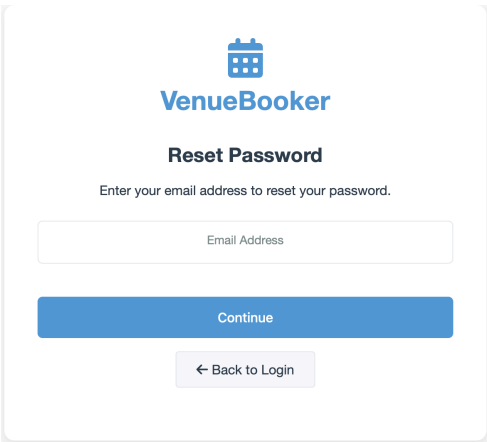

1. Login and Registration - Both clients and vendors use the same front end view to perform basic login functionalities such as creating an account, logging in, and resetting their passwords.

1.1 Login View - Default view which allows existing users to select their account type (Client or Vendor) and login using their credentials. If a user has forgotten their password, they can reset it and new users can create an account. **users can view their information and logout from their session using the icon at the top right of their respective dashboard

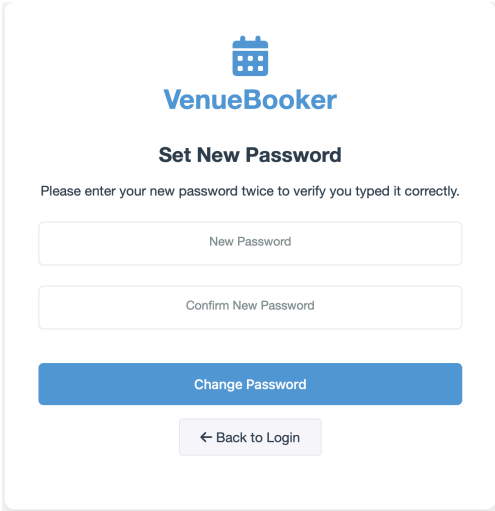

The login view for VenueBooker features the logo at the top, followed by a 'Welcome Back' message. It includes input fields for 'Email Address' and 'Password', a 'Forgot Password?' link, a dropdown menu for account type (currently set to 'Client'), a blue 'Continue' button, and a link for new users to 'Create account'.

1.2 Password Reset - Users first enter an email address to check if it is registered in the database, if the email is associated with an account they will be prompted to enter a new password.

The password reset view displays the VenueBooker logo and a 'Reset Password' heading. It instructs users to 'Enter your email address to reset your password.' and provides an 'Email Address' input field, a blue 'Continue' button, and a '← Back to Login' link.

The 'Set New Password' view shows the VenueBooker logo and a heading. It prompts users to 'Please enter your new password twice to verify you typed it correctly.' and includes input fields for 'New Password' and 'Confirm New Password', a blue 'Change Password' button, and a '← Back to Login' link.

1.3 Account Registration - Users have the ability to create two accounts with the same email address as long as both accounts are not associated with the same user type.

2.4 Messaging a Vendor - When browsing through venues, clients have the ability to message venue owners using the built in interface which is prepopulated with the vendors contact information. After a message has been sent the conversation can be accessed using the view messages tab on the dashboard.

2.5 Managing a Booking - Clients have the ability to view their booking history using the view bookings tab on the dashboard. Bookings are sorted by date, those that are occurring the soonest are placed at the top of the screen and bookings that have already passed are placed at the bottom. Clients have the ability to delete a booking if it is scheduled to occur in five or more days from the current date.

3. Venue Owner Dashboard - The main interface that venue owners will use to make and edit listings, message prospective clients and view booking history.

3.1 Creating a New Listing - Venue owners are provided with a fillable form where they can provide all of the information regarding their venue and can upload a photo. The form enforces validation so that all entries have the necessary information for client bookings.
